FOR YOUR SAFETY

This appliance is adjusted to operate on LPG only. (unless data label specifies different).

If you smell gas:

- Turn off gas supply at cylinders.
- Extinguish all naked flames.
- Do not operate any electrical appliances.
- Ventilate the area.
- Check for leaks as detailed in this manual.

If odour persists, contact your dealer or gas supplier immediately.

Burn – back (fire in tube or chamber:

In the event of a burn – back, where the flame burns back to the jet, immediately turn off the gas supply at the control on the appliance. After ensuring the flame is extinguished, re-light the appliance as per instruction manual. Should the appliance again burn – back, close the control valve and call a service technician. Do not use the appliance until the service technician has declared that it is safe to do so.

Gas – pressure regulator:

This appliance requires an operating pressure of 2,8 kPa at the appliance. A suitable LPG regulator that complies with the requirements of SANS 1237 must be installed.

Important information for the user:

This appliance may only be installed by a registered LP Gas installer. All registered installers are issued with a card carrying their registration number. Ask to be shown the card before allowing the installation work to commence and make a note of the installer QCC number. Upon completion of the installation, the installer is required to explain the

operational details of the appliance together with the safety instructions. You will be asked to sign acceptance of the installation and be provided with a compliance certificate. You should only sign for acceptance of the installation when the installation is completed to your satisfaction.

Note that your invoice is required in the event that you wish to make a guarantee claim.

Important information for the installer.

The appliance may only be installed by a LP gas installer registered with the LPGASA. The appliance must be installed in accordance with the requirements of SANS 10087-1 and any fire department regulations and/or local bylaws applicable to the area. If in doubt check with the relevant authority before undertaking the installation. Upon completion of the installation you are required to fully explain and demonstrate to the user the operational details and safety practices applicable to the appliance and the installation.

WARNING

This product is not to be installed in a separately enclosed bathroom.

WARNING

This is an unvented gas-fire heater. It uses air (oxygen) from the room in which it is installed. Provision for adequate permanent ventilation must be provided. Refer to the **appropriate section** of the user manual.

WARNING

CARBON MONOXIDE POISONING CAN LEAD TO DEATH

Carbon monoxide poisoning: Early signs of carbon monoxide poisoning resemble the flu, with headaches, dizziness or nausea. If you have these signs, the heater may not be operating correctly. Ensure fresh air is supplied immediately and have the heater serviced as soon as possible. Carbon Monoxide may affect people at differing rates than others, such pregnant woman, people with heart or lung disease or anemia, those under the influence of alcohol, and those at high altitudes.
